SEEDING  
THE FUTURE  
SINCE 1856

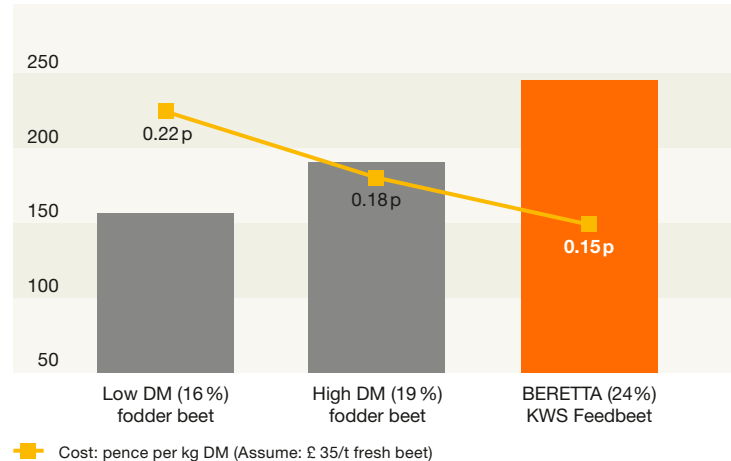

# KWS Feedbeet: BERETTA

## Exceptional feed value and outstanding agronomics

BERETTA is a high dry matter (DM) KWS Feedbeet that will provide some of the highest feed values per hectare. It can deliver exceptionally high DM yields/ha and around a third more fodder than traditional varieties at much lower growing costs. Recognising the importance of excellent agronomic characteristics BERETTA comes with the latest seed activation technology, Early Plant Development (EPD), which enables fast emergence and uniform establishment ensuring your beet crop gets off to a great start.

### BERETTA because, higher dry matter yields cut your feed costs!

kg DM per tonne of fresh beet

### BERETTA provides:

- High DM content
- High DM yields
- Lower cost per kg DM
- 50,000 seed packs
- EPD treated
- Gaucho treatment available

### BERETTA because, excellent agronomics ease cultivation!

10 days after sowing:

Standard seed

The KWS proprietary seed treatment called Early Plant Development (EPD) promotes:

- Fast germination
- High speed and evenness of field emergence
- Fast canopy closure
- Excellent yields
